PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building scalable web applications, REST APIs, admin dashboards, and operational platforms with Node.js, Laravel, React.js, MongoDB, and MySQL. Proven expertise in JWT/OAuth authentication, RBAC, payment gateway integration (Stripe, Moko Afrika), Firebase Cloud Messaging, and third-party API workflows. Since Jun 2026, after resigning from Shine Web Solutions in May 2026, working full-time as an Independent Developer directing AI coding assistants to design and build 6 published Chrome Extensions (Manifest V3), 2 Android apps live on Google Play, and 2 Windows automation tools, with full ownership of requirements, architecture, QA, and Store publishing.

TECHNICAL SKILLS

Languages: JavaScript, PHP, SQL, HTML5, CSS3

Frontend: React.js, Bootstrap, Responsive UI, Chrome Extension UI (Manifest V3, Content Scripts, Service Workers)

Backend: Node.js, Express.js, Laravel, CodeIgniter, Core PHP, REST API Design, MVC Architecture

Mobile, Extensions and Tools: Android Apps (Google Play), Chrome Web Store (6 Live Extensions), Windows Batch Automation, PWA Concepts

Databases: MongoDB, MySQL - Schema Design, Indexing, Aggregations, Query Optimization

Auth and Security: JWT, OAuth 2.0, Role-Based Access Control (RBAC), SHA-256 Encryption, Secure API Authorization

Notifications and Payments: Firebase Cloud Messaging (FCM), Stripe, Moko Afrika Payment Gateway, Wallet and Transaction Systems

Tools and Practices: Git, Postman, Chrome DevTools, Google Play Console, Core Web Vitals, Agile Workflows

AI-Directed Development: Requirements Definition, Prompt Engineering, AI Code Generation and Review, Debugging AI Outputs, QA and Publishing

PROFESSIONAL EXPERIENCE

Independent Developer - Chrome Extensions and Android Apps, Self-Employed | Jun 2026 - Present

- AI-directed development after resignation: Building and publishing own products full-time after resigning from Shine Web Solutions in May 2026 by defining requirements and directing AI coding assistants on what to build and how to build it.
- Shipped and published: 6 Chrome Extensions live on Chrome Web Store, 2 Android apps live on Google Play, and 2 Windows automation tools, all implemented through AI-assisted workflows under my direction.
- Ownership and QA: Owned product direction, architecture decisions, prompt workflows, code review, manual testing, Store listings, updates, and user support.

Full Stack Developer, Shine Web Solutions | Jun 2024 - May 2026

- REST APIs and Workflows: Designed scalable REST APIs and operational workflows using Node.js,

Express.js, Laravel with MongoDB/MySQL.

- Admin Dashboards: Built React.js dashboards for ops management - roles, real-time monitoring, reporting.
- Auth, Payments and Integrations: JWT + OAuth, RBAC, Stripe / Moko Afrika flows, FCM, third-party APIs.
- Quality and Delivery: Improved reliability and performance via optimized queries, reusable components, Postman-tested endpoints.

PHP Developer, Logibloq IT Services | Dec 2023 - Jun 2024

- Product Development: Websites, admin panels, backend systems in CodeIgniter and Core PHP.
- Full-stack Integration: Frontend-backend integrations, auth/sessions, MySQL CRUD modules.

Web Developer, Kutumbh Care Pvt. Ltd. | Mar 2022 - Dec 2023

- Web Platforms: Business websites and operational systems in Laravel, JS, HTML, CSS, Bootstrap.
- Modules and Data: Frontend modules, backend workflows, database integrations.

INDEPENDENT PRODUCTS - PUBLISHED APPS AND EXTENSIONS

Built full-time after resigning from Shine Web Solutions in May 2026 through AI-directed development - I defined the requirements and guided AI coding assistants on what to build and how to build it. Portfolio: https://edevsuraj.github.io/explore-our-apps-and-extensions/ - Extensions live on Chrome Web Store, apps on Google Play.

Chrome Extensions Developer, Self-Employed / Indie | Jun 2026 - Present

- Lock Website (Privacy): Password-protect sites by domain, SHA-256, per-tab sessions, subdomain matching.
- Custom Tab Wallpaper: Custom image/video new-tab wallpaper; uploads or remote URLs.
- SiteSwift - Speed Audit (DevTools): One-click audit for slow resources, Core Web Vitals, SEO fixes.
- Indian Fake Filler (DevTools): Realistic Indian test data, saved prefs, smart randoms for QA.
- Remindy (Productivity): Reminders with new-tab countdowns + notifications.
- Yogi Adityanath New Tab: Inspirational new-tab with EN/HI quotes.
