Chrome Web Store: 6 live extensions | Google Play: Mathify, English Set Go

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building scalable web applications, REST APIs, admin dashboards, and operational platforms using Node.js, Express.js, Laravel, React.js, MongoDB, and MySQL. Experienced in JWT/OAuth authentication, RBAC, Stripe and Moko Afrika payment integrations, Firebase Cloud Messaging, and third-party API workflows. Strong ownership of features end to end, from requirements and database design through implementation, API testing, release, and production support. Since Jun 2026, has independently shipped 6 Chrome extensions (500+ installs on the flagship product, 200+ each on the others), 2 Android apps on Google Play, and 2 Windows tools, using AI-assisted development to accelerate delivery.

PROFESSIONAL EXPERIENCE

Full Stack Developer, Shine Web Solutions | Jun 2024 - May 2026

- **REST APIs and Dashboards:** Delivered scalable REST APIs and React.js admin dashboards for operations, roles, and real-time monitoring using Node.js, Express.js, Laravel, MongoDB, and MySQL.
- **Auth, Payments and Integrations:** Implemented JWT/OAuth authentication, role-based access control (RBAC), Stripe and Moko Afrika payment flows, FCM notifications, and third-party API integrations; validated endpoints with Postman.
- **Backend and Data Design:** Designed reusable backend modules and database schemas to support maintainable feature delivery and evolving business workflows.

PHP Developer, Logibloq IT Services | Dec 2023 - Jun 2024

- **Web and Admin Systems:** Developed business websites, admin panels, and backend systems using CodeIgniter, Core PHP, and MySQL.
- **Workflow Integrations:** Built CRUD workflows and frontend-backend integrations to support daily operations and data management.

Web Developer, Kutumbh Care Pvt. Ltd. | Mar 2022 - Dec 2023

- **Business Websites:** Developed business websites and operational systems using Laravel, JavaScript, HTML, CSS, and Bootstrap.
- **Database Integration:** Integrated backend workflows and databases to support service operations and internal reporting.

Independent Developer, Self-Employed | Jun 2026 - Present

- **Product Delivery:** Designed, built, and published 6 Chrome extensions (500+ installs on the flagship product, 200+ each on the others), 2 Android apps on Google Play, and 2 Windows automation tools.
- **End-to-End Ownership:** Own the full product lifecycle: requirements, architecture (Manifest V3), implementation, QA, store publishing, updates, and user support.
- **AI-Assisted Development:** Use AI coding assistants (OpenCode, ChatGPT Codex, GitHub Copilot) to accelerate development, code review, debugging, and testing while retaining ownership of architecture and quality.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), PHP, SQL, HTML5, CSS3

Backend: Node.js, Express.js, Laravel, CodeIgniter, Core PHP, REST API Design, MVC Architecture

Frontend: React.js, Bootstrap, Responsive UI, Chrome Extension UI (Manifest V3, Content Scripts, Service Workers)

Databases: MongoDB, MySQL - Schema Design, Indexing, Aggregations, Query Optimization

Authentication and Security: JWT, OAuth 2.0, Role-Based Access Control (RBAC), SHA-256 Encryption, Secure API Authorization

Payments and Messaging: Stripe, Moko Afrika Payment Gateway, Wallet and Transaction Systems, Firebase Cloud Messaging (FCM)

Mobile and Desktop: Android Apps (Google Play), Chrome Web Store Publishing, Windows Batch Automation, PWA Concepts

Tools and Practices: Git, Postman, Chrome DevTools, Google Play Console, Core Web Vitals, Agile Workflows, Manual QA

AI-Assisted Development: OpenCode, ChatGPT Codex, GitHub Copilot - Requirements Definition, Prompt Engineering, Code Review, Debugging, QA and Publishing

SELECTED PROFESSIONAL PROJECTS

- **Dispatcher Management System (Node.js, React.js, MongoDB, FCM):** Built REST APIs and a React admin dashboard for call, zone, and unit management with live monitoring and call-termination controls.
- **Pet and Fitness Platform (Node.js, MongoDB, FCM):** Delivered activity tracking, rewards, challenges, leaderboards, multi-pet profiles, and push notifications.
- **School Activity Management (Laravel, React.js, MySQL):** Built class-wise activity workflows covering submissions, approvals, scoring, and achievement points.
- **Ride Management Platform (Node.js, MongoDB, Moko Afrika):** Implemented ride operations, vehicle management, destination/airport/hotel pricing, wallet, bookings, and transactions.
- **Mentorship Platform (Laravel, React.js, Stripe):** Developed booking, scheduling, payouts, Stripe payments, and mentor approval workflows.

INDEPENDENT PRODUCTS

- **Chrome Extensions (6 live on Chrome Web Store):** Lock Website - 500+ installs, privacy-focused site locking with SHA-256 encryption, per-tab sessions, and subdomain matching; Custom Tab Wallpaper, SiteSwift Speed Audit, Indian Fake Filler, Remindy, and Yogi Adityanath New Tab - 200+ installs each.
- **Android Apps (Google Play):** Mathify - maths practice with quizzes and progress tracking; English Set Go - English learning via Hindi with 12 tenses, 11,000+ verbs, and 8,000+ phrases.
- **Web Apps:** Typing Master - touch typing tutor with structured lessons, seven practice modes, live WPM and accuracy tracking, and browser-based progress persistence.
- **Windows Tools:** PC Deep Cleaner - one-click 7-zone junk cleaner; UserCleanup - one-click Windows account remover; both portable with no installation.

EDUCATION

Bachelor of Computer Applications (BCA), 2019 - 2022.
